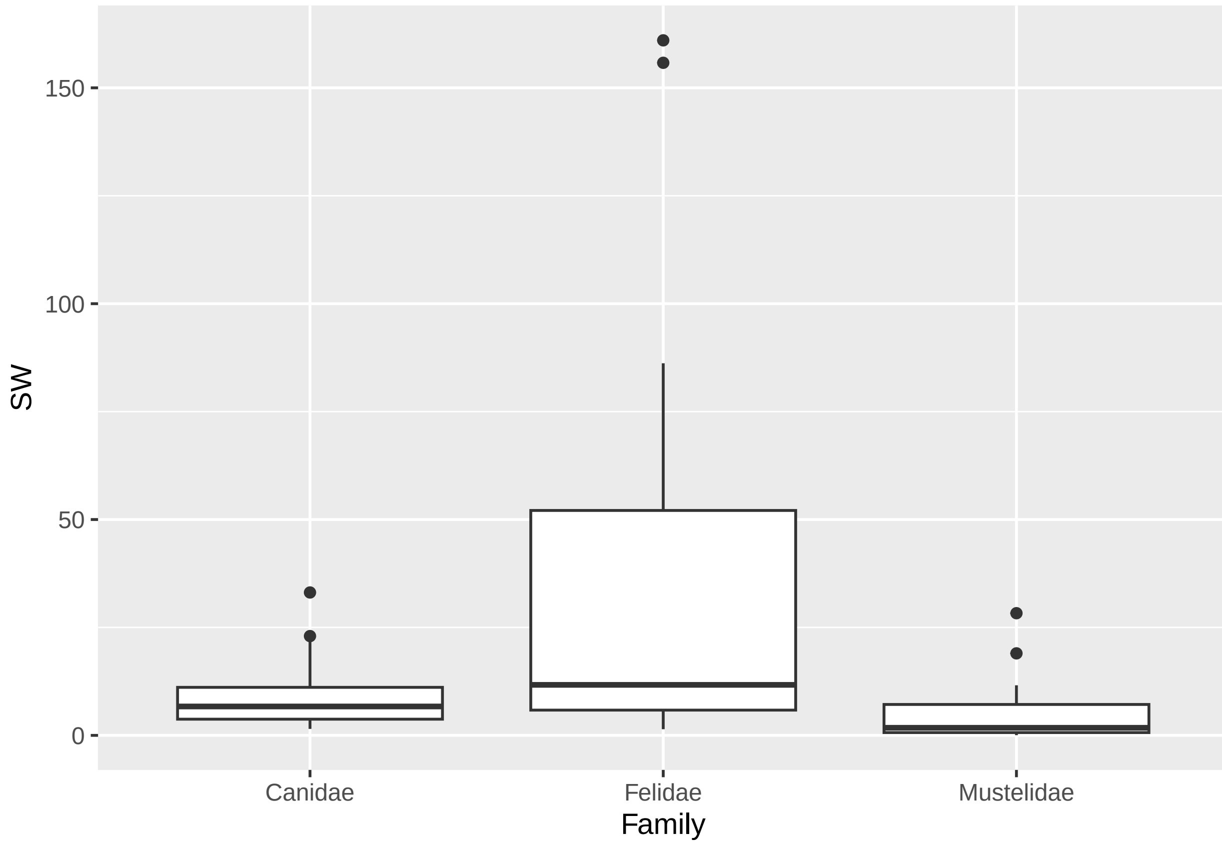
QUESTION: Plot a BOXPLOT that shows how adult weight (SW) varies by Family. Then plot a scatter plot that show how adult weight (SW) depends on birth weight (BW). Please list your code below:

```
library(ggplot2)

# Boxplot
ggplot(carnivs, aes(x = Family, y = SW)) +
  geom_boxplot()
```



```r
# Scatterplot
ggplot(carnivs, aes(x = BW, y = SW)) +
  geom_point()
```

```
## Warning: Removed 25 rows containing missing values or values outside the scale range
## (`geom_point()`).
